

Eve Double Pro-line

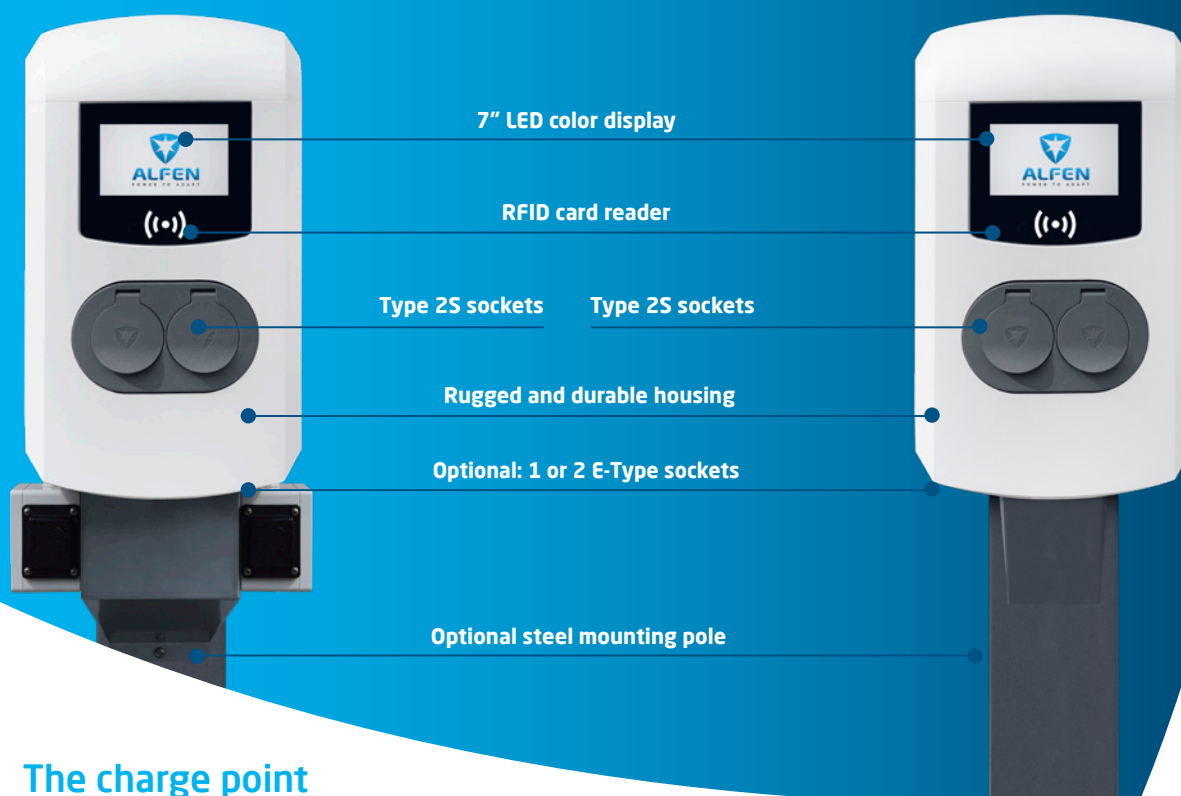

Iconic design and advanced charging technology

Eve Double Pro-line is a charge point produced by Alfen and is equipped with two charging sockets. Particularly suitable for home charging, it is also perfectly suitable for semi-public spaces. In 2017, Alfen completely redesigned and renewed its Eve double Pro-line charge point, relying on the most innovative charging technologies, as well as respecting the expectations of electric vehicle owners. With its large display, improved user interface and robust structure, Eve Double Pro-line is particularly ergonomic and offers advanced intelligent charging features.

Eve Double Pro-line

The charge point

Integrated security

Eve Double Pro-line is equipped with two Type B differential circuit breakers. It is no longer necessary to install this protection separately, allowing for a cheaper installation.

E-socket

The charge point can be equipped with a maximum of two E-Type household outlets, each capable of supplying up to 16A (3.7 kW). Recharging access is granted by an RFID card reader, or by Plug&Charge. Users can then choose which socket to use.

Smart charging

Thanks to its completely redesigned equipment and software, Eve Double Pro-line offers various features such as Smart Charging networks, OCPP 1.6 and a dynamic load power distribution system.

Features

| | | | |
|--------------------------------------|---|-----------------------------------|--|
| Capacity: load per socket | 3.7 kW (16A, 230V), 7.4 kW (32A, 230V), 11kW (16A, 400V), 22kW (32A, 400V) | Authorisation | Plug & Charge, RFID card reader |
| Output | Type 2S sockets | Colour | RAL9016 Front panel (White) RAL7043 Rear panel (grey) |
| Input | Single or dual power cable | KWh counter | Mid certified, allows payment of fees |
| Standards and guidelines | IEC 61851-1 / -22 (2017) | Dimensions (l x w x d) | 590 x 338 x 230 mm |
| E-socket | Options: 1 or 2 sockets Type-E domestic plug | Dimensions (l x w x d) | 122 x 139.5 x 85 mm |
